

MULTITASKS

MTH - MTH/HP

FAE multi-function head for tractors from 300 to 500 hp.

The top-of-the-range FAE multi-function machine enabling milling of rock slabs, crushing of stones, milling of asphalt and ground stabilization, with a maximum operating depth of 20 po. The gear transmission enables operation with constantly optimal levels of torque and power. The variable-geometry crushing chamber guarantees excellent results in terms

of breaking down material. The volume of the chamber increases based on depth with a reduction in fuel consumption and an increase in operating speed. The Hardox wear-resistant counter blade and grid on the rear hood guarantee the desired granulometry of material processed.

Kinematics for the adjustable frame, allows a perfect synchronization of the rotor when penetrating the soil

Bolt-on extensions allow to perfectly cover the working width of the machine, easy to change

Cooling system guarantees high performance in all working conditions

Internal replaceable protections to allow using the machine in extreme conditions
